DETAILED ACTION

Applicants' response, filed 2/9/207, has been received. Claims 21 – 41 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21 – 41 **remain** rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Response to Arguments

Applicants' amendment has rendered the issues presented in the previous office action, which lead to this rejection, moot. However, the amendment has introduced new issues that necessitate a rejection under this statute.

Claims 1, 38, 40 and 41 now recite trademarks. The use of trademarks in a claim is indefinite because a trademark only discloses the source of goods, not the precise nature of the goods themselves.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21 – 41 **remain** rejected under 35 U.S.C. 103(a) as being unpatentable over US 2,149,052 in view of EP 0 421 921 and Canadian Pat. 1,305,166 for reasons of record and those discussed below.

Response to Arguments

Applicants' argument has been fully considered, but is not persuasive. Applicant argues that despite the fact that the methods of copending claims use materials that have identical compositions to that which is suggested by the art, the coatings of the art will not undergo the recited method step of becoming dissolved or detached in the stomach.

In response, it is noted that a substance and its properties are inseparable. Once the compositions suggested by the art are swallowed (their intended use in the art), then the location in the body in which the coating becomes dissolved or detached is a property of the coating itself – the method's practitioner has no further control of this. Since the art suggests coatings that are commensurate with the claims (see the teaching of cellulose acetate phthalate on page 4, lines 40 – 43 of the EP document), this method step is also suggested in the art *vis a vis* the suggestion to use a coating specific properties that will cause the claimed step to occur.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
